

**Se chiedete all'Intelligenza Artificiale, in inglese, "Hey Google, sing the vaccine song", Google Assistant vi canterà:**

Let's celebrate that we have the vaccine,  
To help us bring a change to this old routine.

It can help us build our immunities  
While taking care of our communities.

Vaccines are safe and an important step  
Towards opening up and shaking hands again.

And going somewhere we couldn't visit for months  
Protecting ourselves and the world at once.

Scientists worked night and day  
In record time they found a way.

Like superheroes in masks and gloves  
Helping us get back to what we love.
